PYTHON EXPERT

PROFILE

Permanent 3 years of experience is preferred

Soft Skills Autonomous Organised

Quantilia is a dynamic fintech company providing advanced data solutions to financial institutions. Our platform offers a comprehensive suite of tools for portfolio management, ESG risk analysis, and more. We are looking for a proficient Financial Data Analyst with strong Python programming skills and a deep knowledge of finance and financial instruments.

As a Python Specialist - Financial Data Analyst, your key role will involve converting raw financial data into meaningful insights. You will focus on utilizing Python to process, analyze, and model data pertaining to financial markets and instruments. Working closely with our finance team, you will apply quantitative techniques to address practical financial challenges, supporting informed, data-driven decision-making.

Key Responsibilities:
-> Write efficient and scalable Python code to process large datasets.
-> Develop models for risk analysis, performance analysis, and financial forecasting.
-> Develop and maintain Python scripts for data extraction, cleaning, transformation, and analysis.
-> Ensure data integrity and scalability of the models and pipelines by adhering to best coding practices.
-> Collaborate with the finance and product teams to translate financial data into business insights.
-> Clean, transform, and validate data from multiple sources.
-> Create automated pipelines for data extraction and analysis.
-> Design and deliver reports or dashboards using Tableau or similar tools.
-> Work with cloud platforms (e.g., AWS) for data processing and analysis.

QUALIFICATIONS

-> 3+ years of professional experience working with Python in a data-centric role.
-> Strong understanding of financial markets, financial products, and financial data.
-> Experience with data analysis libraries (e.g., Pandas, NumPy, Matplotlib) and SQL.
-> Comfortable working in a cloud-based environment (AWS preferred).
-> Proven ability to work with large datasets and complex data transformations.
-> Knowledge of financial instruments such as stocks, bonds, derivatives, etc..
-> Familiarity with Tableau or other data visualization tools (a plus).
-> Passion for the financial industry and a strong understanding of financial products and services.
-> Good English spoken is a must.

What We Offer:

-> A vibrant office located in the heart of Paris or Nice, offering an international work environment

your career.
-> A competitive salary with performance-based incentives.
-> A collaborative and innovative work environment.
->Career growth opportunities in a rapidly expanding fintech company.

Joining the Quantilia team means becoming part of a dynamic, forward-thinking company at the intersection of finance and technology. You'll work alongside a highly skilled, international team in a collaborative and fast-paced environment, contributing to cutting-edge projects that directly impact top-tier clients like banks, pension funds, and asset managers. With opportunities for professional development, mentorship from industry experts, and the chance to work with advanced technologies, Quantilia offers an exceptional platform for personal growth and career advancement in both data analytics and finance. Plus, you'll enjoy the vibrant lifestyle of Paris or Nice, France, where our office is located.

If you are ambitious, passionate about finance and technology, and ready to take on a challenge, we would love to hear from you. To apply, please send your CV and cover letter to hr@quantilia.com.
