STEP UP
ENGINEERING@HUMANPOTENTIAL

GEMALTO INTEGRATOR H/F

STEP UP is a fast-growing IT and Industrial consulting services company, placing the development of human potential as the primary vector of excellence in business. We're looking for people who share our values and want to join a human scale company. If this sounds like you, and the career below sounds exciting, we'd like to hear from you.

Job Description:
Our partner is a major solution provider to financial institutions, retailers, and other players in all regions of the world.
This includes strong identity verification for enrolling new customers, payment data encryption, and multiple authentication schemes to access the digital banking services.
They keep developing the range of software and services to respond to the rapid evolution of the financial services driven by regulatory changes and the arrival of new fintech players. The service required by our client is to connect the clients to the cloud solutions and bring the full potential of the services.
Integrator will collaborate with several teams across organization (dev team, infra team, support team, project management) as well as with different partners during the onboarding phase. The activity will take place in a very dynamic environment, with multiple customer projects in parallel.

The stakes on this position:
Have excellent communication skills to be able to liaise with users and the technical team
Be a team-player, at ease in an Agile environment
Be able to handle stress without impacting the team
Have a keen eye on cybersecurity issues

Who are you?
You have strong experience in cloud technologies and systems
You own an IT master, or you already have 3 years of experience as an integrator in a similar environment
Proficient written and verbal communication skills in English, French is a plus

Technical skills: You got experience of the following technologies or similar ones.
· Unix / Windows OS
· SSL, Certificates, Key management, JSON, YAML files, connectivity TLS
· Splunk or similar
· AWS: code commit, connect to EC2, notion with micro services
· Run queries on Oracle/MongoDB
· Web services (SOAP/REST)
· Python, shell scripting, smart cards, EMV, cryptography, security
· Apache HTTPD and other web servers (proxy, reverse proxy)

Soft skills:
· You have excellent communication skills and can work with different teams
· You are autonomous and motivated

· You have experience in change management
· You can listen and take in consideration user's needs
· A good atmosphere in the team is essential for you
· You have a solution-oriented mindset

Above all, we value potential, a person who will have the ambition to carry out an ambitious and exciting project.

Possibility of permanent or freelance position. Position to be filled quickly in Sophia-Antipolis.

Recruitment process:
- First exchange of 15 minutes by phone to discuss your desires and issues
- 1 Technical and functional interview with the team leader
- Personality test to be carried out online
- Exchange with the team and the operational manager to validate the adequacy

Département : 06 - Alpes-Maritimes
Experience : 3 à 5 ans
